International Journal of

SYSTEMS SCIENCE

The Theory and Practice of Mathematical Modelling, Simulation Optimization and Control in relation to biological, economic, industrial and transportation systems

VOLUME 24

Editor

Professor B. Porter, Department of Aeronautical and Mechanical Engineering, University of Salford, Salford M5 4WT, U.K.

Editorial Office

Editorial Office, International Journal of Systems Science, Taylor & Francis Ltd, 4 John Street, London, WC1N 2ET, U.K.

Editorial Board

Professor S. Arimoto, Department of Mathematical Engineering and Information Physics, University of Tokyo, Japan.

Professor R. Gorez, Laboratoire d'Automatique et Dynamique des Systèmes, Université Catholique de Louvain, Louvain-la-Neuve, Belgium.

Professor S. C. Gupta, Information and Control Sciences Center, Institute of Technology, Southern Methodist University, Dallas, U.S.A.

Dr. M. K. R. Habib, Department of Electrical and Computer Engineering, Kuwait University.

Professor M. Ito, Automatic Control Laboratory, Faculty of Engineering, Nagoya University, Japan.

Professor G. J. Klir, Department of Systems Science, Thomas J. Watson School of Engineering, Applied Science and Technology, State University of New York at Binghamton, U.S.A.

Dr. V. Kučera, Institute of Information Theory and Automation, Czechoslovak Academy of Sciences, Prague, Czech Republic.

Professor W. T. Lin, Department of Management Science and Systems, School of Management, State University of New York at Buffalo, U.S.A.

Dr. K. L. Mak, Department of Industrial and Manufacturing Systems Engineering, University of Hong Kong.

Professor R. Perret, Laboratoire d'Automatique, Université Scientifique et Médicale, Grenoble, France.

Professor R. Rosen, Department of Physiology and Biophysics, The Dalhousie University, Halifax, Canada.

Professor J. K. Sengupta, Department of Economics, University of California, Santa Barbara, U.S.A.

Professor Ya. Z. Tsypkin, Institute of Control Sciences, Moscow, Russia, C.I.S.

Professor J. L. Willems, State University of Ghent, Ghent, Belgium.

Dr. R. K. Yedavalli, Department of Aeronautical and Astronautical Engineering, Ohio State University, Columbus, U.S.A.

Subscription Information

The *International Journal of Systems Science* (*ISSN 0020 7721*) is published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK.

Annual Subscription 1994: £671, US$1128.

Second class postage paid at Jamaica, New York 11431. US Postmaster: send address changes to the *International Journal of Systems Science*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003.

Printed in the UK by Burgess Science Press, Rankine Road, Basingstoke, Hampshire RG24 8PR, UK. The paper used in this publication is 'acid free' and conforms to the American National Standards Institute requirements in this respect.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland, where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributor. **Australia:** R. Hill & Son Ltd, Suite 2, 119 Gardenvale Road, Gardenvale, Victoria 3185. **New Zealand:** R. Hill & Son Ltd, Private Bag, Newmarket, Auckland 1. **India:** Universal Subscription Agency Pvt. Ltd, 101–102 Community Centre, Malviya Nagar Extn. Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Company Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156. **USA, Canada and Mexico:** Taylor & Francis, Inc., 1900 Frost Road, Suite 101, Bristol, Pennsylvania 19007. **UK and all other territories:** Taylor & Francis Ltd, Rankine Road, Basingstoke, Hampshire RG2 8PR

CONTENTS OF VOLUME 24

NUMBER 1

Optimal production strategies for announced unit cost increases
C. P. KOULAMAS 1

Decentralized sensitivity of stochastic composite systems
L. SOCHA 13

On the stabilizability, controllability and observability of linear hereditary systems with distributed commensurate delays
M. DE LA SEN 33

Conditional entropy theorem for recursive parameter estimation and its application to state estimation problems
N. MINAMIDE and P. N. NIKIFORUK 53

Economic development with accumulation of physical capital and human capital
WEI-BIN ZHANG 65

Robustness optimization of discrete multivariable systems with non-linear time-varying unmodelled dynamics
FENG-HSIAG HSIAO 79

Adaptive decoupler for multivariable systems
A. M. WAHBA and M. A. SHEIRAH 97

Constructing rule-bases for multivariable fuzzy control by self-learning. Part 1: System structure and learning algorithms
D. A. LINKENS and JUNHONG NIE 111

Constructing rule-bases for multivariable fuzzy control by self-learning. Part 2: Rule-base formation and blood pressure control application
D. A. LINKENS and JUNHONG NIE 129

Grey linear programming, its solving approach, and its application
GUOHE HUANG and R. D. MOORE 159

Modelling and optimization of data assignment in a distributed information system
HEESEOK LEE 173

Model reduction of general queueing networks
K. R. KU-MAHAMUD and A. T. OTHMAN 183

Robust control system design with state constraints
M. ZOHDY, M. S. FADALI and A. ABDEL-WAHAB 193

Routh approximation method applied to order reduction of linear MIMO systems
D. P. PAPADOPOULOS and D. V. BANDEKAS 203

Determination of the transfer matrix of multidimensional-singular systems
G. O. GLENTIS, G. E. ANTONIOU and S. E. MENTZELOPOULOU 211

NUMBER 2

Rationalization and application of algorithms for integrated system optimization and parameter estimation
J. E. ELLIS, N. H. KANDAMBY and P. D. ROBERTS 219

Frequency-domain conditions of discrete-time controllability and stabilizability for infinite-dimensional systems
TOSHIHIRO KOBAYASHI 231

Zeros of discrete-time infinite-dimensional control systems
TOSHIHIRO KOBAYASHI 243

Optimum ordering policies with age-dependent minimal repair and two types of lead times
SHEY-HUEI SHEU and CHING-TIEN LIOU 253
Robust stabilization of uncertain linear dynamical systems
HANSHENG WU and KOICHI MIZUKAMI 265
Variable structure control using an adaptive boundary of system uncertainty
JU-JANG LEE, YANGSHENG XU and DONG SANG YOO 277
New technique for decoupling control
Q. J. XIA, M. RAO, Y. X. SUN and Y. Q. YING 289
Fuzzy adaptive control
C. BATUR and V. KASPARIAN 301
Adaptive control scheme for a robot manipulator: direct decoupler and PID controller
F. C. TENG, G. F. LEDWICH and G. SHANNON* 315
On the assessment of social benefits derived from employment policies
G. L. GÓMEZ M. 329
State estimation of stochastic singular linear systems
M. DAROUACH, M. ZASADZINSKI and D. MEHDI 345
Optimal control for linear periodic systems by using multirate piecewise constant sampled state feedback
LAIPING SU and KENICHI ABE 355
Discrete variable structure control systems
XINGHUO YU 373
Finite-dimensional model reference adaptive control of a class of nonlinear distributed systems with quasi-sliding mode
MOTOFUMI SASAKI, YOSHIKAZU HAYAKAWA, SEIZO FUJII, KUNIO KOIZUMI and TOSHIHIRO IWAKI 387
Information theory and economic growth models
J. K. SENGUPTA 403

NUMBER 3

Stochastic robot forward dynamics with spatially distributed measurement noise
KWANG-SOOB KO and R. K. READ 419
Some models for developmental systems. Part XIII: Multilevel development by parallel programming
J.-C. GILLE, S. WEGRZYN and P. VIDAL 441
Accelerated time discrete event simulation in a distributed environment
D. A. COOK and U. W. POOCH 451
Robustness of D-stability for discrete large-scale uncertain systems
CHIEN-HUA LEE, TZUU-HSENG S. LI and FAN-CHU KUNG 479
Decentralized model-based control of a class of large-scale interconnected systems
S. R. PANDIAN and M. HANMANDLU 499
The effects of market power on the stocks and prices of world coffee
J. K. SENGUPTA and E. C. WANG 515
Causes of finished goods inventory imbalances in industrial firms that utilize a channel of distribution: a structural equation approach
R. B. ROSECKY 529
POC net, a subclass of Petri nets, and its application to timed Petri nets
A. OHTA and T. HISAMURA 539
Performance evaluation of *n*-unit priority standby systems
T. K. DAS and M. A. WORTMAN 553

Neighbouring optimal guidance for aeroassisted non-coplanar orbital transfer
D. S. NAIDU 563
Identification of non-linear systems by recursive kernel regression estimates
A. KRZYŻAK 577
Robust optimization of multivariable feedback systems with time-varying non-linear uncertainties
MAAN-HUANG TU, CHIH-MIN LIN and YU-PING LIN 599

NUMBER 4

Multi stage Monte Carlo optimization applied to a six hundred point travelling salesman problem
W. CONLEY 609
Approximation of the departure process from $G/M/1/K$ and $M/G/1/K$ queueing systems
B. POURBABAI 627
Existence, threshold and stability results for an age-structured epidemic model with vaccination and a non-separable transmission coefficient
D. GREENHALGH 641
Disturbances-utilizing optimal controller for discrete-time systems
TSU-TIAN LEE, CHEN-LANG LIU and WEN-JIEH WANG 669
Multi-rate regulator design of two-time-scale systems via digital redesign method
HISASHI KANDO, YOSIFUMI YONEMOTO and TETSUO IWAZUMI 691
Study of pulp cooking control using the systems approach
N. HVALA, J. ČERNETIČ and S. STRMČNIK 707
Fault detection in linear discrete dynamic systems by a reduced order generalized-likelihood-ratio method
SHOGO TANAKA and P. C. MÜLLER 721
Robust implementation of sliding mode control schemes
R. DAVIES and S. K. SPURGEON 733
Improving delay estimates derived from least-square algorithms and Padé approximations
ER-WEI BAI and DONG H. CHYUNG 745
Diamond and simplex stability regions
LONG WANG and LIN HUANG 757
Canonical form observability for discrete-time affine non-linear systems
D. J. KAZAKOS 769
A new algorithm for approximating the state of nonlinear systems
G. ZIMMER 777
Stochastic approximation method for solving the stochastic multiobjective programming problem
N. BABA and A. MORIMOTO 789
Robust design of discrete-time systems via optimization
M. A. ZOHDY, M. S. FADALI and J. LIU 797
Correspondence
Comments on 'Parity vector approach for detecting failures in dynamic systems'
J. Y. KELLER, S. NOWAKOWSKI and M. DAROUACH 805

NUMBER 5

New matrix method for multipoint Padé approximation of transfer functions
T. N. LUCAS 809

Simulation applied to a three hundred degree polynomial
W. CONLEY 819
Modelling the time-series variation of earnings response coefficients in the Finnish stock market
T. MARTIKAINEN, P. YLI-OLLI and A. GUNASEKARAN 829
Fault tolerant control with switching strategy
ZEUNGNAM BIEN and HEEGYOO LEE 841
Non-parametric approach to stochastic linear programming
J. K. SENGUPTA 857
Input–output decoupling of non-linear systems using a simple compensator of minimum order
S. D. VOLIOTIS and M. A. CHRISTODOULOU 873
Closed-loop Stackelberg strategies for singularly perturbed systems: the recursive approach
KOICHI MIZUKAMI and FUMIHIRO SUZUMURA 887
Eigenvalue clustering in subregions of the complex plane for interval dynamic systems
ING-RONG HORNG, HUEY-YANG HORNG and JYH-HORNG CHOU 901
Dynamic state feedback control of two cooperative manipulators
XIAOPING YUN 915
Frequency domain criteria for strict aperiodicity of linear interval systems
C. B. SOH 929
Robustness considerations for *p*-step matrix integrators with uncertainty in the continuous system model
XIAORU NIU and J. A. DE ABREU-GARCIA 943
Application of physical system theory and goal programming to modelling and analysis of waste management in national planning
SUSHIL 957
State estimation schemes for fault detection and diagnosis in dynamic systems
J. KORBICZ, Z. FATHI and W. F. RAMIREZ 985
State estimation of stochastic singular linear systems: convergence and stability
M. DAROUACH, A. BASSONG ONANA and M. ZASADZINSKI 1001
Quality locations for the constrained minimax location model
S. JORJANI, C. H. SCOTT and T. R. JEFFERSON 1009

NUMBER 6

Eigenstructure assignment in robot tracking applications
A. SWARUP and M. GOPAL 1017
Balanced input–output assignment
W. GAWRONSKI and F. Y. HADAEGH 1027
Positively invariant sets for continuous-time systems with the cone-preserving property
S. TARBOURIECH and C. BURGAT 1037
On identification of block oriented systems by non-parametric techniques
A. KRZYŻAK and M. A. PARTYKA 1049
Robust stability for linear uncertain time-delay systems with delay-dependence
TE-JEN SU and PIN-LIN LIU 1067
On eigenstructure assignability using parametric output feedback
S. DALEY 1081
Decentralized variable-structure adaptive controller synthesis of large-scale systems subjected to bounded disturbances
CHIANG-CHENG CHIANG 1101

Stochastic differential equations with fractional Brownian motion input
G. JUMARIE 1113
Relationship between the controllability grammian and closed-loop eigenvalues: the single input case
S. PRADHAN, V. J. MODI and M. S. BHAT 1133
Near-optimum steady-state regulator for discrete singularly perturbed systems with a prescribed degree of stability
QIJUN XIA, XUEMIN SHEN, YIQUN YING and MING RAO 1145
Constructing control rules for a dynamic system: probabilistic qualitative models, lookahead and exaggeration
T. URBANČIČ and I. BRATKO 1155
Finite-dimensional decentralized VS-MRAC of non-linear interconnected distributed parameter systems
MOTOFUMI SASAKI, YOSHIKAZU HAYAKAWA, SEIZO FUJII, KUNIO KOIZUMI and TOSHIHIRO IWAKI 1165
Characterization and compensation of discrete-time non-minimum-phase systems for precision tracking control
CHIA-HSIANG MENQ and J. ZHIJIE XIA 1189
Modified extended Kalman filtering for supervised learning
GUANRONG CHEN and HALUK ÖĞMEN 1207
Failure detection, identification and accommodation based on a new accommodation filter
J. RAGOT and D. MAQUIN 1215

NUMBER 7

A job scheduling approach based on a learning automaton for a distributed computing system
ZEN-KWEI HUANG and SHENG-DE WANG 1221
Incentive and quality assurance: an agency theoretical perspective
YEONG LING YANG 1233
Optimal treatment of cancer diseases
A. NOVAK and G. FEICHTINGER 1253
Determination of optimal shipping policy by inventory theory
CHIANG KAO, CHIA YON CHEN and JRJUNG LYU 1265
Functioning of autonomous groups: the role of delayed information
E. SZCZERBICKI 1275
Performance deterioration in optimum linear systems
C. Y. KAYA and D. J. BELL 1285
Description of dynamic systems from the perspective of a network of interactions
C. PAHL-WOSTL 1301
Error bound on the solution of a linear differential equation in Chebyshev series
J. E. DZIELSKI and T. A. DRISCOLL 1317
Multivariable adaptive control for a class of nonlinear systems
CUN WU HAN, JING XIN ZHANG and XING YUAN GU 1329
Optimal capital accumulation paths for growth models with infinite planning horizon and non-convex technologies
D. KRAVVARITIS, G. PANTELIDES and N. S. PAPAGEORGIOU 1339
Modelling the effect of demand variations on the performance of a production system
A. GUNASEKARAN, T. MARTIKAINEN and P. YLI-OLLI 1349

Fuzzy chemical kinetics: an algorithmic approach
D. SINGER and P. G. SINGER 1363
Microcontroller-based real-time digital control of slow processes with dead time
S. M. EL-SHAL and M. S. MAHMOUD 1377
Generalization of the matrix stability region placement method
F. MOSSAYEBI, J. A. DE ABREU-GARCIA and T. T. HARTLEY 1391
Physical realizability of output feedback control laws
A. TORNAMBÈ 1403
Rule-based artificial neural networks
R. R. LEVARY 1415
Erratum 1419

NUMBER 8

Pulse width modulation control of robotic manipulators
H. SIRA-RAMIREZ, M. ZRIBI and S. AHMAD 1423
A simple method of recursive parameter identification for a class of distributed parameter systems
W. MARSZALEK and H. UNBEHAUEN 1439
Four rendezvous problems for *n* non-identical simple-integral plants
H. UNBEHAUEN and I. VAKILZADEH 1455
Numerical algorithms with condition and accuracy estimates for linear systems design
P. HR. PETKOV and P. L. LAZAROV 1473
Self-organizing neural control system design for dynamic processes
CHENG-LIANG CHEN and WEN-CHIH CHEN 1487
Modelling and identification of manufacturing systems: decomposition stage
E. SZCZERBICKI 1509
State estimation with optimal selection of the output matrix for discrete-time linear systems
L. CAROTENUTO, P. MURACA, P. PUGLIESE and G. RAICONI 1519
Method of designing windows based on spline approximation
KAZUO TORAICHI, RYUICHI KAWAMOTO, MASARU KAMADA, MAMORU IWAKI and ROKUYA ISHII 1539
Transformation of a continuous time-invariant linear system into a discrete one
MORISHIGE KIMURA 1551
Identification of a class of continuous time-varying linear systems via block pulse functions
Z. H. JIANG and W. SCHAUFELBERGER 1575
Integral equation models for continuous dynamical systems
S. MUKHOPADHYAY, A. PATRA and G. P. RAO 1589
Application of a multi-layered neural network to system identification
C. S. FU and M. POCH 1601
Optimal testing policy for a computer system with fault margin
SHEY-HUEI SHEU 1611

NUMBER 9

Active damping of flexible structures via saturating actuators
WEIJIAN ZHANG 1621
Reliability growth modelling for the procurement of flight hardware
WON JUNG 1653

Multi-modal parameter optimization by the automata approach
ZEN-KWEI HUANG, SHENG-DE WANG and TE-SON KUO 1669
Positively invariant sets for singular discrete-time systems
S. TARBOURIECH and E. B. CASTELAN 1687
Frequency domain criteria for robust stability of perturbed systems with uncoupled variations in odd and even coefficients
C. B. SOH 1707
A state-space description for GPC controllers
A. W. ORDYS and D. W. CLARKE 1727
Receding-horizon predictive control with exponential weighting
TEA-WOONG YOON and D. W. CLARKE 1745
Echelon stock formulation for multi-stage lot-sizing with component lead times
A. R. CLARK and V. A. ARMENTANO 1759
The design of discrete linear time-dependent stochastic control systems
C. FRANGOS and Y. YAVIN 1777
Identification and adaptive control of SISO singular systems
H. WANG and S. DALEY 1791
Three-degree-of-freedom joint H_2/H_∞ optimal controllers
A. CASAVOLA 1803
All unidirectional error-detecting code for universal applications
J. VAIDEESWARAN and S. K. SRIVATSA 1815
Announcement 1821

NUMBER 10

Guest Editorial
P. M. FRANK 1823
Fuzzy logic control
J. RAGOT and M. LAMOTTE 1825
Fuzzy control in process automation
